ZYON

WebDefentra

ZYON WebDefentra revolutionizes web security with AI-powered intelligence. Real-time web backdoor detection, file integrity protection, and comprehensive server defense work together to keep your web services running without interruption.

Key Features

Solution Architecture

WSS AI (Web Server Safeguard v3.0)

Real-Time Web Backdoor Detection

WSS AI detects web backdoor and malicious URLs injected into web servers in real time, rapidly identifying and isolating threats through immediate, automated response.

WARSS (Website Attack Restoration Security Solution)

Real-Time Web Defacement Detection & Remediation

Upon detecting unauthorized web modifications, WARSS blocks the attack and instantly rolls back to original resources-ensuring uninterrupted service continuity.

AI That Delivers

WEBDEFENTRA: Web Security Perfected

Outpace evolving cyber threats with proactive detection and rapid, seamless deployment.
WebDefentra is your all-in-one enterprise web security platform.
